

Title of paper	Planar UWB antenna with multi-slotted ground plane
Authors	Azim, R., M. T. Islam, N. Misran, S. W. Cheung, and Y. Yamada
Year of Publication	2011
Publishing details	The paper studies the method of using a ground slot for bandwidth improvement of compact ultra-wide band (UWB) antennas with microstrip line feed. Slots of different shapes such as triangular, rectangular, partially circular and hexagonal, placed on the ground plane under the feed line of the radiator are studied for impedance matching.
